Diversification

Our municipal bond sleeve utilizes low-cost investment vehicles and provides well-diversified access to the municipal bond market.

Regular Attention

Our team performs regular analyses on these assets to ensure portfolios adhere to model rules.

Annually Rebalanced

This portfolio is rebalanced and reallocated annually.

All investment strategies have the potential for profit or loss. Changes in investment strategies, contributions or withdrawals may cause the performance results of your portfolio to differ materially from the composite performance. Different types of investments involve varying degrees of risk, and there can be no assurance that any specific investment will either be suitable or profitable for a client's investment portfolio.

Diversification and asset allocation help you spread risk throughout your portfolio, so investments that do poorly may be balanced by others that do relatively better. Neither diversification nor asset allocation can ensure a profit or protect against a loss.

Economic factors, market conditions, and investment strategies will affect the performance of any portfolio and there are no assurances that it will match or outperform any particular benchmark. ARGI Investment Services (AIS) is registered as an investment advisor with the United States
